BIA & DIA

Data Connectivity

- Broadband Internet Access (BIA) & Dedicated Internet Access (DIA): with a nationwide robust network powered by 10G interface enabled POPs, and decentralized data centers all around the country, we are the largest and premium B2B ISP of Bangladesh that connects you directly to the internet via a high-performance access service with guaranteed capacity and SLA.

- Data Connectivity: Data transfer speed is seamless, and clients receive full bandwidth without any sharing. Backed by the transmission of our NTTN partners, we ensure you raw bandwidth.

- Express Route: Etheric's express routing facilitates private connections between worldwide servers., with a single hop and lower latency

CONNECTIVITY SOLUTIONS

- MPLS: Our MPLS Solutions (international & domestic) provide sophisticated traffic engineering options that enable traffic to be sent over dedicated & non-standard paths

- IPVPN: Our IPVPN Solution allows people, systems, and things, to communicate with each other securely using a single internet protocol address (IP)

- PLC: International Private Leased Circuit (IPLC) is a Point-to-Point (P2P) private line that provides customers with dedicated pure bandwidth.
